

The Memphis Man or Memphis the Marvellous as his foster mum calls him is little more than a puppy - who fathered puppies! Memphis is the Dad of two pups we recently had through SPR, Memphis and his ex-wife Annie, babies Gracie and Phoenix came into rescue in November, 2012 and while "the kids" have since been rehomed, Memphis and Annie (Dad and Mum) have taken a little longer to prepare for life ever after.

Their beginning was far from perfect, but that is the past and since coming into care, Memphis has been desexed, had entropion (corrective eye lid) surgery, been vaccinated and microchipped and his skin has been treated and the infection he suffered has now resolved (about time)!!!!

Memphis is just as sweet as pie, or is that pei??? Everyone LOVES the Memphis man - he is great with other dogs, a bit timid around kids, loves a good belly rub and is an all round great dog. He walks well on the lead and will sit for his meals. Being little older than a puppy himself, Memphis has chewed a few "nawty" things, but in all he really does just want to please his people. Like 1 in 3 pei that pass through SPR, Memphis does need daily Thyroxine medication for an under active thyroid. He will need this for life at a cost of about 50c per day. This keeps his organs functioning correctly and has no side effects and doesn't effect his life span at all.

Memphis would like a home with a doggy girlfriend, perhaps a family where someone is

around most of the time and lots of love care and attention.

Available for adoption at much less than the cost of his rescue and vet care, Memphis is available for just \$ 680 and is awaiting your application RIGHT NOW!!!!
